

CURTAIN - 2300x1800 h mm

COD. 2821/121

Curtain is made of 100% Trevira® CS fabric. Trevira® CS is the world leader of flame retardant antibacterial fabrics. This brand guarantees the product a high level of quality. Trevira® CS meets all the international fire regulation tests in relation to the health and safety rules.

The trevira® CS fibres have a permanent flame retardant and antibacterial characteristic which is not comparable to fabrics that have a flame retardant and antibacterial surface treatment at second phase. The characteristics of flame retardant, dermatologic, physiologic and hypoallergenic have a long life guarantee.

The high quality of the fabrics are also resistant to wear and the fibre colours don't fade even after many washes.

Fabric features:

- Antibacterial and flame retardant.
- The fibres do not absorb liquids, resist vomit and blood stains, leaving no trail after washing.
- Thin and light fabrics.
- Ecological.
- Long life.
- Washable at 60° or dry cleanable, and fast drying.
- Many different designs.
- The fibres colours are long lasting.
- Fabric water resistant on request.

Washing instructions:

The fabrics are washable at 60° also with disinfectants, or dry cleanable. In the event of crusted dirt pre-washing is advised.

Weight: 500 g

Number of rings: 18
