75	36 kg	150 kg
Ø Wheels	Weight	Patient weight

Features

Belate MED armchairs are specially design to be used in hospitals, clinics, nursing homes and also in home care.

Some of its main characteristics are:

- Structure:

  It has a resistant pine wood structure with laminated panel, which protects it against impacts.

  The armchair has been designed with soft lines and rounded edges, without sharp edges and cutting surfaces to avoid any problem with cuts and scratches.

- Foams:

  All the armchair is made by a polyurethane foam base (25 kg/m3), except the seat that is made of a higher density foam (30 kg/m3), which gives more collapsing resistance and guaranteeing an ergonomic posture.

- Upholstery:

  The foams are upholstered with latex-free vinyl fabrics, breathable, easy to clean, abrasion resistant, anti-fungus, antibacterial and fireproof M2.

- Backrest:

  Ergonomic design backrest with integrated wings. The backrest tilts to adapt different comfortable positions for the user.

- Footrest:

  At the same time the backrest is tilted, the footrest lifts automatically.

- Relax mechanism:

  To tilt the backrest and lift the footrest you only have to lean on and the body weight will push backwards the backrest.

- Seat:

  Seat with elastic suspension N.E.A. that allows an optimal distribution of the weight and giving an unlimited durability.

- Wheels:

  Four 75 mm. diameter pivoting wheels with independent brake system in the two back wheels.

- Armrest:

  Upholstered armrest wide and straight, to encourage the user comfortability and avoiding pressure points on him.

- Other characteristics:

  The armchair has a handle in the back to facilitate the transportation.

  In the lower part of the side has a metallic support to place an IV pole.

Belate MED Armchair

Technical Information

Total length in seat position	820 mm.
Total length in tilted position	1700 mm.
Total length with armrest	690 mm.
Total height	1030 mm.
Sitting surface height	420 mm.
Sitting surface width	510 mm.
Sitting surface depth	500 mm.
Maximum backrest tilting angle (relative to the seat)	155º
Extremities maximum tilting angle (relative to the seat)	90º
Armchair weight	36 kg. (depending on model)
Maximum patient weight (MPW)	150 kg.

Standard

Size	Support	Transport	Wellness	Others		Accessories
One place		4 wheels. With brake in the back ones	Winged backrest	Back handle		IV Pole
			Integrated arms	IV pole support		

Upholstery
