UVgun Classic 72

Silent and universal UV-C flow lamp - 72W

Desktop and wall or standalone version

Inactivation germs, viruses and fungi

UVgun Classic Floor

UV Classic Desktop

UVgun UV-C flow lamps can work during the presence of people and animals in the rooms and are absolutely safe.

Air is being sterilised in a closed sterilisation chamber made of acid resistant steel.

UVgun lamps are based on forced air flow.

All lamps can be optionally equipped with Wifi modules and remotely controlled by any smartphone.

Specification

- UV-C tubes power: 72W
- Sterilisation chamber made of acid resistant steel
- Dimensions: 70x18x10,5cm
- Weight: 6,2kg (without stand)
- Stand weight 4,2kg
- Max area: up to 45m² (recommended: 10-25m²)
- Max cubbage: up to 110m³ (recommended 25-60m³)
- Counter (option)
- Wifi module (option)

Possible configurations

- UVgun Classic Desktop - desktop or wall mounted
- UVgun Classic Desktop T - desktop or wall mounted with counter
- UVgun Classic Floor - standalone
- UVgun Classic Floor T - standalone with counter

Housing

Black, white, acid resistant steel

UV-C flow lamps use ultraviolet (UV-C) radiation for inactivation on bacteria, viruses, fungi and other microorganisms existing in the air.

Thanks to the ventilator (ventilators) air is aspirated and flows through a closed chamber with UV-C tubes inside, where sterilisation occurs.

In this way UV-C flow lamps can work all the time during presence of people and animals in the sterilised rooms

UVgun is a brand of OPTOtech company.

All UVgun UV-C lamps are designed and manufactured in Poland by OPTOtech

PANDA - it's not only black and white colors of our lamps. **PANDA** is a symbol of our Corporate Social Responsibility Strategy.
