

Features

Complete electric and articulated bed; easy and friendly use, it is seeking welfare and patient comfort. Some of its main characteristics are:

- For easy transport:
 - Light weight, with high rolling, wear and rust resistance. It has a minimum noise emission whilst moving.
 - Centralized braking system by a braking bar located in the footboard area.
- Easy and intuitive handling:
 - Depending on the bed options, the bed can have a wired control for the patient and another with function blocking and pre-programmed functions for the nursing staff.
 - The bed has a battery in case the main power fails or the bed is unplugged. It allows to do more than 300 complete movements.
- Encourage the patient welfare due to:
 - Double regression system, it reduces the pressure in the pelvic area, way to decrease the pressure ulcers risk (PU's) (165 mm ± 10 mm).

It has a feet positioning system to place the patient feet in several positions, reaching fowler position.

New pre-programmed positions to ensure the patient welfare (safe exit, 30° backrest, etc).

- Other improvements:
 - HPL hand removable bed base divided in 4 sections. Like the bed, it is easy to clean, with great protection against the growth and spread of bacteria.
 - Polypropylene made side rails with grip zone and folding system by gas spring. All to facilitate sitting up and getting out the bed.
 - It has an easy to remove headboard and footboard.
 - Linear actuators with IP66 protection.
 - 4 protective cylinders in the corners avoid the shocks, minimize impacts and bed deterioration.
 - Totally customizable vinyls.

Furthermore, Newcare V2 bed has a wide range of accessories and complements that enable to comply with all the needs of a hospital room and intensive care units.
