

# NewCareV3 Bed

## Features

Complete electric and articulated bed; easy and friendly use, it is seeking welfare and patient comfortability.

Some of its main characteristics are:

- For easy transport:

Light weight, with high rolling, wear and rust resistance. It has a minimum noise emission whilst moving. Optionally it can have a shock-absorbing, antistatic and directional fifth wheel. Centralized braking system by a braking bar located in the footboard area.

- Easy and intuitive handling:

Depending on the bed options, the bed can have a wired control for the patient and another with function blocking and pre-programmed functions for the nursing staff, as well as membranes in the bed side rails.

The bed has a battery in case the main power fails or the bed is unplugged. It allows to do more than 300 complete movements.

- Encourage the patient welfare due to:
  - X-ray transparent backrest section, X-ray ready. Extensible bed base, up to 30 cm.
  - Double regression system, it reduces the pressure in the pelvic area, way to decrease the pressure ulcers risk (165 mm).
  - It has a feet positioning system to place the patient feet in several angles.
  - New pre-programmed positions to ensure the patient welfare (safe exit, 30° backrest, etc).
- Other improvements:
  - HPL hand removable bed base divided in 4 sections. Like the bed, it is easy to clean, with great protection against the growth and spread of bacteria.
  - Polypropylene made side rails with grip zone and folding system by gas spring. All to facilitate sitting up and getting out the bed.
  - It has an easy to remove headboard and footboard with blockage system.
  - Linear actuators with IP66 protection.

Cylindrical side guards on all four corners avoids the shocks, minimize impacts and bed deterioration.

Totally customizable vinyls.

Furthermore, Newcare bed has a wide range of accessories and complements that enable to comply with all the needs of a hospital room and intensive care units.
